

SHORT PACKERS

PRODUCT DESCRIPTION

BurrowTech Short Packers are products that allow point repair while providing fluid evacuation in pipes. These are produced by vulcanizing SBR+NR rubber and high-strength fabrics. It is resistant to temperatures between -30°C and +70°C. The biggest advantage is its large bypass and wheel structure, making it easier to fit inside the pipe. It can move and evacuate faster than the standard by-pass packers.

*Can be produced as a Push Rod compatible head.

Patch Length Stripes

Large By-pass & Wheel System
